*To the Members of the Class of 1905:*

The Second Class Report has been made possible by the keen support of a large majority of our class who have taken a loyal interest in trying to make it a success. I wish to apologize for any mistakes that may occur and trust they will be called to my attention.

I regret to report that there is a large number of "lost men" and those not heard from. This state of affairs is most unsatisfactory and I believe could be rectified to a large extent if every man in the class felt it a duty to reply promptly and fully to my communications. Be sure to look over the list of "those not heard from" who at the same time appear to be "lost men". If you recognize some one concerning whom you can give information please notify me at once.

The most important event since graduation was our triennial celebration. During that glorious week we enjoyed ourselves immensely and, incidentally, showed our prowess in athletics by victories on field and river.

I feel that the thanks of the Class are due to Sidney Curtis, '05, who has worked most conscientiously in the preparation of this report and I take pleasure in acknowledging his services.

Very sincerely yours,

SAMUEL NELSON HINCKLEY.

## JOHN MOSELEY ABBOT

I have not held any offices of profit, honor, and trust. The time that others spent in attaining those offices, I was busily engaged seeking recreation in foreign travel. Before my freshman year, in order to fit myself for the cultured surroundings, I took a plain trip through Europe in which I endeavored to see as much in as short a time as possible. After the strenuous freshman year, in the company of another "student" I visited Norway and the North Cape. In 1903 I worked hard and succeeded in getting my degree the following year. This event was duly celebrated by taking a trip around the world with my brother. This trip lasted almost a year. Then came a period of hard work, interrupted only by a flying visit to Bermuda. In 1908 I took an automobile tour through Italy, France and England. Later in the year I went to London and Paris and then home.

I am now back again working hard once more and I have great hopes that when the next time comes for me to write an account of my life for the class report, I shall be able to modestly enumerate my achievements and let them speak for themselves. Very unfortunately that is not the case at present. Business: Leather, T. A. Kelly & Company, West Lynn, Mass. Present residence: Westford, Mass.

## HARRY TANNER ADAMS

Has not been heard from. His address is unknown.

## JAMES ADAMS, JR.

Was in the publishing business with Little, Brown & Company, Boston, publishers, four years and about a year with the Baker & Taylor Company in New York. Since last summer I have been in the bond business with Willett, Roe &

Hagen, 15 Congress St., Boston. Present residence: 90 Longwood Ave., Brookline, Mass.

### PHINEAS HILLHOUSE ADAMS

After leaving college I entered the College of Physicians and Surgeons of Columbia University and remained there four years, graduating with degree of M.D. The summer after graduating I went to Germany where I remained five months, the greater part of the time studying medicine in Munich. On the way back to New York I visited Austria and Italy. The first of January, 1910, I became a member of the "house staff of Bellevue Hospital," New York, 1st Medical Division, for a period of two years. That is now my present occupation. Member: Harvard Club, St. Nicholas Club, City Club. Present residence: 106 East 70th St., New York City.

### RAYMOND MARSTON ADAMS

Owing to the death of my father, Charles Day Adams, Harvard, '73, in March, 1909, I have been obliged to apply myself diligently to the business which he left, consisting largely of handling probate matters, trust funds, etc. In November, 1909, broken down from overwork, I was obliged to take a rest and went to Cuba for my health. Upon my return I joined the Boston Press Club and have found an hour's daily relaxation and good-fellowship there very beneficial. It is especially pleasing as a number of Harvard men are members.

Married Rhyspah Maude Andrews in November, 1906. Member: Sigma Alpha Epsilon, Boston University Chapter. Occupation: Lawyer, 10 Tremont St., Boston. Present residence: 447 Harvard St., Brookline, Mass.

of mine—consequently I left Harvard after one short year.

In the summer of 1902 I visited England, Wales, and Ireland and returned the following September and entered Pennsylvania State College. Here I took a two year course in mining engineering. In the summer of 1904 I concluded I knew all about mining and went to Cripple Creek to put some of my knowledge into practice. Here, however, disputes were present between union and non-union men and they were settling their arguments with dynamite. I obtained a position in Denver as bookkeeper for a wholesale house on the market. Later I was salesman for the same firm until November, 1905. This month I was married to Mamie Tomlinson, at Denver. We took a trip to California. San Francisco seemed a very beautiful city to us, so I obtained a position as salesman of plate glass for Whittier-Coburn Company.

On April 18th, 1906, the great earthquake and fire left us with our health and strength and one suit of clothes each—for which we were very thankful. (The evening before the earthquake I met Mr. Bain, one of our classmates). The rocking of the earth causes a departing feeling, so we returned to Denver, Colorado, where I received my old position as salesman. In the spring of 1908 I went into partnership on the market with two other men and in the following summer sold out to one of the partners. I brought my wife, son, and daughter to Old Orchard, Me., for a two months stay and in September, 1909, went to work for Lowell Bros. & Bailey Company, Boston, as salesman where I expect to remain.

Children: Thomas Henry Adams, born, August 27, 1906; Mamie Louise, born, June 6, 1908. Present residence: Medford, Mass.

this concern's business, I joined a company engaged in the manufacture of ozone for commercial purposes. My duties took me to various places, at one time necessitating a half year's residence in Pittsburg, where I had charge of the company's water-sterilization plant at the Homeopathic Hospital. From my point of view the management of the company was about as unstable as  $O_3$  itself, which led me to seek a more solid berth. For more than a year, I have been a salesman for N. W. Harris & Company. Address: 56 William St., New York City.

I am not married—yet. But I am approaching the matrimonial state, having secured one of the most necessary things — a fiancée. Present residence: 49 West 39th St., New York City.

### HARRY WOOD ANDREWS

After graduation, from among several positions open, I selected one in the middle west which carried me back near the place of my birth—St. Paul, Minn. Here I became connected, as draftsman, with a firm engaged in the fabrication of structural steel. This was not a new business for me, as I had had some experience before entering college. I remained in this position for a year; but the desire to get back East proved too strong and I returned to the Boston Bridge Works where I had worked before. Here I worked on plans for railroad bridges. I remained the two following years in

### ARTHUR STANLEY BEALE

After graduation I attended the Union Theological Seminary, and there obtained the degree of B.D. in 1908. There a man learns how little he really knows and it makes him wish he were back at college. A joyous unity and fellowship at the Union Theological Seminary fitly followed the life at college. The school demanded practical activity as well as scholarship. As a young assistant in Brooklyn, I found that grappling with the problems of actual life gave balance and faith to the theories of the class room. Settlement duties and the Jerome campaign furnished spice. I am now a clergyman at Stoneham, Mass. New England churches use a man's patience and earnestness. If he can wait upon the receptivity of the conservative saints and not lose his enthusiasm, if he can curb the ardor of zealous progressives nor lose his temper,—a life of joyful service in reconstruction in thought and realignment of forces with problems will be his. Present address: Stoneham, Mass.

### WINTHROP BELLAMY

1905-06: Graduate year at Harvard as head assistant in Chemistry 1. July, 1906-December, 1906: with the Hodgman Rubber Co., Tuckahoe, N. Y. January, 1907-August, 1909: chemist with the Solvay Process Company, Syracuse, N. Y. During my stay in Syracuse, I became a member of the National Guard of N. Y., enlisting in Troop "D" (cavalry), solely for privileges of riding and shooting, but before a year had passed, I was enthusiastically studying "military science." I wish to take this opportunity of stating my belief that it is the duty of every American male citizen to serve at least one enlistment in the National Guard or the regular army. During June and July, 1909, I was in Chicago with the Semet-Solway Company; from October, 1909, to June, 1910, I taught mathematics and chemistry at the Morristown School, Morristown, N. J., and in July, 1910 I returned to technical chemistry by beginning work with the Midvale Steel Company of Philadelphia. My marriage to Lura Alice Dowst took place on October 13, 1910. at Syracuse. ### HAROLD WHITMAN BENNETT

After graduation in June, 1904, as a member of the class of 1905, I moved to New York City, where I have lived most of the time since then. In September, 1904, I entered the American Academy of Dramatic Arts and remained in that school until July, 1905. Two months later I obtained my first regular employment as associate editor of The Dramatic Mirror, where I did critical, technical and "re-write" work. At the same time I was for several months the regular critic for a social paper, now defunct. After approximately one year's service on the Dramatic Mirror, I became the dramatic news editor of the New York Times, in which capacity I did secondary criticisms, Sunday interviews with leading players, and practically founded the extensive theatrical news department which is now a feature of the paper. At this same time I became a partner with Edmund Picton in an unsuccessful literary and play agency which we operated for some months under the name of Picton and Bennett.

On May 18, 1907, I was married in Cambridge, Mass., to Lillian Mitchell Barbour and thereafter spent three months abroad with my wife, staying for the most part in London and Paris. While in London it was my good fortune to serve temporarily as assistant to the London correspondent for the New York Times.

On my return to New York I determined to leave theatrical journalism for a more direct connection with the "pro-

fession" and became general press representative for Walter N. Lawrence, during the last year of his lease of the famous old Madison Square Theatre in New York City. Mr. Lawrence, though then the manager of several well-known productions including "The Three of Us," got into difficulties with the Theatrical Syndicate and was temporarily forced out of business by the Syndicate within four months. I then returned to my old position on the New York Times, where they were happily willing to take me back, with a practical knowledge of theatrical managerial problems and my own very definite opinion of the Syndicate. I remained with the Times until September, 1908, when I left to take my present position as assistant to the general press representative for the Shubert theatrical enterprises, which now comprise more productions than have ever before been handled by one concern. In this capacity I have had some little influence in the publicity campaign against the Syndicate and have done much of the writing and publicity detail for about 100 different attractions.

Aside from my work in the New York Times, I have written articles for many newspapers and periodicals, often, however, to be signed by other people. I have written two sketches, both pretty bad. I have sold a certain amount of fiction but mainly to secondary magazines. Children: Philip Barbour Bennett, born, February 29, 1908; Holland Bennett, born, August 14, 1909. Present address: The Lyric Theatre, West 42d Street, New York City.

### WARREN BARTON BLAKE

At the end of my junior year, I left Cambridge with just courses enough to insure a degree, and visited, for the first time, England, France and Italy. Returning with the cold weather, I hunted my first job, and ran it down in Philadelphia, in the business-office of the Curtis Publishing Company, publishers of the Ladies Home Journal and the Saturday Evening Post. Even in Philadelphia I felt under-educated, however, and I returned in September, 1906, to Cambridge, this time to the Graduate School. During that year I came my nearest to specializing—which was none too near, as I had to find time somehow to tutor and “assist.” Received an A.M. in June, 1907. The next year I held an exchange fellowship at the University of Paris; where I was, I believe, the first Harvard Fellow even to attempt giving light instruction at the Sorbonne. Fortunately for me, I received more than I gave. Returning, I became a journalistic “free lance”, and learned the pains and pleasures thereof in Philadelphia and in New York, contributing signed and unsigned work to various newspapers and magazines, including Scribner's, the Atlantic, Lippincott's, the Chicago Dial, the Nation, etc. For some months now I have been a member of the editorial staff of the Independent, whose offices are on the eighth floor of the aged office building at 130 Fulton Street, New York City. The Harvard Club of New York is the only social club of which I am a member. My only political office has been the vice-presidency of a reform election district association. Home address: Merion Station, Pennsylvania.

### RALPH HERBERT BOLLARD

After graduation and until the autumn of 1906 I was engaged in tutoring, and was living at various places a short distance from New York City. From the fall of 1906 until the following May I was travelling throughout the United States and abroad, my wanderings taking me to the Pacific Coast, from the Canadian border to Southern California, and east by way of the Grand Cañon to New York City. From New York City I sailed for Egypt, touching en route at the Azores, Gibraltar and Italian ports. In Egypt I went up the Nile as far as Assouan. From Egypt I went to Athens and thence to Constantinople and then by the overland route to Budapest and Vienna and on down through the Italian cities to the Riviera and Paris. After a month in England and southern Scotland, I left for New York in May. Was married May 25, 1907, at Topeka, Kan., to Katherine P. Welch. Margaret Ellen Bollard, born July 14, 1908.

I served during the summer of 1907 as assistant secretary to President Eliot, continuing this very pleasant work in the service of the College with the invaluable privilege of personal association with President Eliot until the following fall. I then determined to go west and establish myself in business—a course of action which I had been nursing since my trip to the Pacific Coast the preceding year. I moved to Seattle in the autumn of 1907, where I have since made my home. For the first year I served on the reportorial staff of the Seattle Post-Intelligencer, work for which I found my experience

on the Crimson had helped to prepare me. In the summer of 1908 I left newspaper work to go into the mortgage loan business, in which I have since remained. In the autumn of 1910 I organized with Frederic H. White, '06, the firm of White & Bollard, Inc., and we are now busily engaged in conducting a general mortgage loan business on Seattle business and residence properties. We have succeeded in establishing an excellent business and have good hopes for the future. I am finding life worth living out here on Puget Sound. About the only serious drawback to my residence here is its distance from the college and its various activities and from the great majority of the fellows one learned to be so fond of in college. Possibly that very remoteness tends to make those associations and fond memories the more precious and the more keenly enjoyed when renewed by new contact.

There are something more than one hundred and fifty Harvard men in and about Seattle—counting those enrolled for greater or less time in the various departments of the University. We have a lively Harvard club with frequent meetings during the year, an annual baseball game with the Seattle Yale club, in which we have been trimming the Elis with monotonous regularity; we maintain a yearly scholarship of \$300 to help some deserving Seattle boy through Harvard, and altogether try to keep the name of Harvard in good repute in this young western community. Possibly one of the activities which I have most enjoyed since coming to Seattle has been my participation in the organization of the College Club of Seattle. Although at the time I write the club has been in existence less than six months we have a membership of a fine lot of young university men from institutions all over the country, the membership now being in excess of 200. I have served as treasurer and a member of the board of trustees from the inception of the club and have found the experience most gratifying. I shall always be delighted to have the privilege of introducing any classmates to this organization of virile, clean-cut, young university men who in time are going to be such a powerful force in the development of this Puget Sound country. In April I sailed from Philadelphia for Antwerp. I spent two months at Tours, France, studying with a private tutor. Later I went to Paris and Brussels and spent some time in each city. During my trip I endeavored to make a special study of the châteaux of Touraine, and of the cathedrals of northern France. The fall of 1908 I spent at home. In January, 1909, I came to Huron College, Huron, S. D., to assist in modern languages and mathematics. Having decided to go into some industry connected with New England, I went down to New Bedford soon after graduating and entered a cotton mill that was in process of construction. There I had a good opportunity to see the mill grow and to see the machinery put together. I then entered a well known New Bedford mill and worked as an operative, going meanwhile to the local textile school four nights a week. After about a year and a half of this sort of life

I had a good opportunity to go as a salesman into a good cloth commission house in New York. This chance I accepted largely on account of the poor physical condition I was getting into at the mill work. After a year at selling I decided to return to mill work and again entered a mill as an operative—this time in Lowell. While working there an opportunity occurred to go as superintendent into the Androscoggin Mills of Lewiston, Me. Have now been in Lewiston a little over two years. I find the people congenial and enjoy having the fields and woodlands so near at hand. In the summer time when the twilight is long, I am able to keep in trim by tennis and base ball, and in the winter I take a great deal of pleasure in snow-shoeing over the hills—especially by moonlight. Poor health on account of a bad attack of inflammatory rheumatism, following exposure in a heavy snow storm about the middle of May, forced me to resign my position in August, 1906. After spending eight months in bed and five months convalescing, I obtained a position in the engineering department of the San Diego and Arizona Railway in September, 1907. In the following two and one-half years I was in

The surveys being practically completed and construction commenced, on April 1, 1910, I resigned, and shortly afterwards left San Diego for the Sunset and Midway oil fields in Kern County. In July I accepted a position with the Pine Mountain Water Company, which was then starting a survey of fifty miles for a water supply for the oil fields. ### NEWELL BLY BURNS

I attended the Harvard Medical School for four years, graduating in June, 1909. Between terms, I worked in outpatient departments of Boston hospitals and dispensaries. In the summer of 1909, I went out to the coast and junketed around from Prince Rupert, B. C. to Mexico. I returned to New York City last winter and for more than a year engaged in hospital work. I saw and learned a lot about the East Side that I never knew before,—how thirteen people can get along in a suite of two rooms and beat the high cost of living. I was very favorably impressed with New York City,—the best of places to go after business, or pleasure. I have recently passed the Massachusetts Medical Board, and am going back to the country to settle down. I am still single, and courage is petering out. Member: Harvard Club of New York City, Corinthian Yacht Club, of Marblehead, Salem Club, Mason of Royal Arch degree. Present address: Danvers, Mass.

### ALFRED CUMMINGS BURRILL

Up to the present time I have been experimenting with human nature, as to the best ways of popularizing the results of science for the public. I have tried it both by teaching in

private schools in New Hampshire and in New York City, and more especially by work and lectures in public institutions such as the American Museum of Natural History, New York City. I have devoted some time to forestry and to anthropology. In the Milwaukee Public Museum, I handle about 13,500 public school children twice a year, and about 1,000 high school and college students, besides some 1,000 in adult audiences. This lecture work constitutes a series of introductory lectures, lantern-illustrated, along the various lines of science and investigation, and keeps the public pulse in sympathy with research. It makes the modern public museum count as a scientific institute rather than as a storehouse of dusty relics of the middle ages. There is a great future for this sort of work. Member: local cavalry troop, in a branch of activity. (Military drill, and "rough riding," which Harvard fails to support like western state universities for the defense or rather, the betterment of the nation), Wisconsin Natural History Society, Wisconsin Audubon Society, (vice-president), Wisconsin Archaeological Society, Wisconsin Academy of Arts, Sciences, and Letters. Present address: 1016 Bartlett Avenue, Milwaukee, Wisconsin.

### FREDERIC CURTIS BUTTERFIELD

In September, 1907, I went west to Morningside College, Sioux City, Ia., as instructor of piano and theory and as musical director and organist at the First Congregational Church. While there I wrote the music for an original college song. With the coöperation of three other Harvard men in the faculty I helped organize the Sioux City Harvard Club. Judge David Mould, '80, was elected president, and I became the secretary. The present year I am on leave of absence for the purpose of study and travel in Europe. I spent July and August, 1910, travelling in France, Germany, Holland, Belgium, and England. Since September, I have

### FREDERICK LANSDOWN CANDEE

For four years after leaving college I was master at Heathcote Hall, a private school for boys. Each summer finds me back in Cambridge happily busy in developing a little further the supervision of playground work,—a work begun in undergraduate days under the direction of a committee of citizens who saw here a great need. The need of supervision, plan, and development for playgrounds, though it had a tiny, and discouraging start, is now sufficiently well demonstrated so that the whole body of citizens in Cambridge will assume responsibility for the situation. The chances for service in playground work, and in the broader field of social work are tremendous. Although hard to break ties and associations which meant very much to me, I gave up the narrower field of endeavor to enter as apprentice in a field of limitless possibilities. As holder of the South End House Fellowship in economics during last year and again this year I feel as if I had been having the “chance of my life” and whatever my future development is, it will be based on this extremely “constructive period” of my life. Present address: Wallace, Idaho. Home address: 20 Union Park, Idaho.

### ALFRED ST. VRAIN CARPENTER

On leaving college, I returned home to Colorado Springs and entered the banking department of the Colorado Title and Trust Company. I remained with this company for slightly over two years when I was offered the position of assistant secretary and assistant treasurer in the Rocky Mountain Bank Note Company. I left the bank note company after three months to engage, with my brother, Leonard, '04, in electric lighting development, in Arkansas. In November, 1908, I opened a real estate and insurance office with G. C. Lockhart, under the firm name of Lockhart & Carpenter. I remained in this firm until January, 1910, when the Oregon fever became so bad that I sold out to Lockhart and left for Medford, in the Rogue River Valley. My brother and I own and operate the Veritas Orchards of ninety acres, situated two miles east of Medford. We raise only fancy pears and apples. Get the fever and come on out! Member: Rogue River Valley University Club, Medford Golf and Country Club, El Paso Club, Colorado Springs. Present address: Medford, Oregon.

### HOWARD POTTER CARY

Howard Cary was born in New York City on December 22, 1881. He prepared at Groton School, entered Harvard in the fall of 1901, and received his A.B. in 1905. He died May 4, 1906.

### CARLL SMITH CHACE

### CHARLES LYON CHANDLER

I was appointed private secretary to the United States minister to Portugal, November 1, 1905; student interpreter to Japan, October 8, 1906; vice-consul at Tamsin, Formosa, December 29, 1906; vice-consul at Dalny, Manchuria, March 21, 1907; United States consular assistant, August 1, 1908;

vice-consul at Montevideo, Uruguay, November 25, 1909, and vice-consul general at Buenos Aires, Argentine Republic, July 24, 1909. I am a member of the Sociedade de Geografia de Lisboa, (Lisbon, Portugal), Centro Estudiantes de Derecho, Buenos Aires, North American Society of the River Plate, Buenos Aires, and Sociedad Sportiva Argentina, Buenos Aires. I helped to organize, and am secretary of the Harvard Club of the River Plate, and was the first secretary of the United States Universities Club of Buenos Aires. I have studied at the Curso Superior de Letras, Lisbon, Portugal.

While in Buenos Aires I attended the Faculty of Law of the University of Buenos Aires, and received a certificate of proficiency in international law. I believe I am the first Harvard man ever to attend this university, which is the largest in South America, and I have been told that I am the only foreigner who has ever been elected a regular member of the Law Students' Club, Centro Estudiantes de Derecho, of that university. At the second international congress of American students, which was held in Buenos Aires in July, 1910, I was chosen to represent Harvard University by the president of the United States Universities Club of Buenos Aires, and helped to organize a lecture on American University Life, which was given before that congress, at which fifty-four views of Harvard were displayed. In this manner students from nearly all the South American, and some Central American, republics were enabled to get an idea of Harvard University. I was called upon twice during this conference to make addresses on behalf of the foreign delegates; and at the University of La Plata, where we were the guests of honor on July 15, I was obliged to speak at some length in Spanish before that university, both as the representative of Harvard and as the United States Universities' delegate. For some extraordinary reason the Graduate School of Business Administration has had me give three lectures at Harvard on the economic development of the Argentine Republic. While I have published no books, thirty of my reports from Buenos Aires and Montevideo have been published by the department of commerce and labor, in the daily consular reports, and

several of these have been reprinted in newspapers throughout the United States. In South America I use daily four different languages, one to swear, one to order soda, and the other two for the more dignified relations as vice-consul general. Business address: Department of State, Washington, D. C. Home address: 411 Washington Street, Brookline, Mass.

### ALFRED ENDICOTT CHASE

After graduation in 1904, as of 1905, I took a trip around the world. I spent the first summer in England and Europe, went to Greece in November and then to Egypt in December. I went up the Nile to the first cataract at Assouan, then returned to sail for India, where I spent about a month. Ceylon, Burma, Singapore, and Java, I visited briefly. In Japan I spent about one month, and returned to San Francisco just after the fire. I found representatives of 1905 throughout my trip. In Switzerland I joined F. T. Colby for a short time; found Roger N. Baldwin in a villa near Florence; met John Bowditch, Roger Derby, and Maurice Tilden in India, and in Japan, and saw H. G. Dillingham, captain of the 1904 crew in Honolulu. Upon my return home, I worked in the City Trust Company for one month, and in the banking house of N. W. Harris & Company for two years. I then took a trip to California. I am now in Boston, in the employ of Wm. A. Read & Company, bankers, 19 Congress Street. Present residence: 47 Baltimore Street, Lynn, Mass.

### EDWIN JACKSON CHESNUTT

The year after leaving college I visited England, France, Italy, and Germany, although I spent most of the year in London and Paris. I returned to this country in 1907. I have traveled extensively throughout this country and Canada. I have held various positions of a secretarial nature, have written several articles for newspapers, write occa-

### WILLIAM CONVERSE CHICK

I finished college in February, 1905, returning, after a trip to California, in June for a degree. I sailed for Europe, July, 1905, and after visiting France, Switzerland, Germany, Italy, Egypt, Austria, Turkey, and England, in the order named, returned in June, 1906. The trip was entirely for pleasure, sight-seeing and golf. I played golf mostly in England, the south of France, and St. Moritz, Switzerland, where I had the good fortune to annex the "Championship of the Engadine." I devoted the summer and fall after my return mostly to competitive golf with varying success, but since then have only had time for a few club events, with an occasional opportunity with the state team. Since December, 1906, I have been associated with Estabrook & Company, bankers, 15 State Street, Boston, Mass. Present residence: 347 Beacon Street, Boston, Mass.

### CLIFFORD BLAKE CLAPP

For somewhat over six years, beginning in June, 1904, I was employed in the Harvard College Library, at first on appointment by the librarian, but later by the Corporation. Until March 1, 1907, my work was in the ordering department; since that date and until October 1, 1910, in the catalogue department.

Since October 1, 1910, I have been in charge of the cataloging and classifying at the Dartmouth College Library. I was married in November, 1906, at Dorchester, Mass., to Edith Temple Horne. Robert T. Clapp, born October 3, 1908. Richard G. Clapp, born March 3, 1911. Member: American Library Association, New England College Libraries, social club of libraries of Boston and vicinity.

### HERMANN FREDERICK CLARKE

I spent the early months of 1905 in Europe, and returned for a degree in June. For a year, I was employed by the New England Mutual Life Insurance Company. In July, 1906, I went into the bond business as an employee of S. D. Loring & Son. Two years later I made the final change. I am now with Estabrook & Company, bankers, 15 State Street, Boston. I became a Mason in January, 1910, at Manchester, New Hampshire. Present residence: 5 Warren Street, Winchester, Mass.

### ANDY LLYOD CLOTFELTER

After graduation, I spent one year in the Harvard Law School, and then returned to Kansas City, Kansas, and entered the law office of Henry McGrew, as a partner of his son, Joseph T. McGrew, a Michigan University man, the firm name being McGrew and Clotfelter. At this time I had not been admitted to the bar, but appeared in court and tried many cases just the same, and was duly admitted upon examination to practise in all the courts of Kansas on the 23rd day of January, 1908. On the 19th day of February, 1910, I was admitted to practise in the federal courts. In March, 1909, our law firm dissolved partnership, my partner forsaking the law to engage in the investment and brokerage business, and since then I have practised law on my own account at 721 Minnesota Avenue. On March 11, 1910, I received the appointment as Assistant Attorney General for Wyandotte County, Kansas, which office I held until I tendered my resignation on December 8, 1910. The newly elected Attorney General, John S. Dawson, against my protest, insisted that I carry on my work begun in General Jackson's term, which I agreed to do. I was so commissioned, the commission still remaining in force. The duties of my office were the prosecutions of violations of the prohibitory and anti-gambling laws of Kansas. I prosecuted approximately two hundred actions. In April, 1909, I engaged in a four-cornered race for the office of city attorney and was beaten by a comparatively narrow margin by a one-arm man, who worked the sympathy racket successfully. Present residence: 647 Oakland Avenue, Kansas City, Kansas.

At the close of his sophomore year, he was stricken down with a form of Bright's disease, so subtly disguised that it was not recognized until a fortnight before his death, which occurred at his home, September 19, 1903.

### JOHN HENRY CUMMINGS, JR.

I finished the college course in three years, entered the Harvard Law School in my senior year, was admitted to the Massachusetts Bar in 1906, and graduated from the law school in 1907. The year 1907-1908, I spent in Boston, in the law offices of the firm of Boyden, Palfrey, Bradlee & Twombly. In the fall of 1908 I went to Kansas City, Mo., remaining there for almost a year—till the summer of 1909, when I moved to Chicago, and after being admitted to the Illinois Bar, entered the office of the law firm of Sheriff, Dent, Dobyne & Freeman. I am doing the usual work, and having the usual experiences that are part of a lawyer's lot. I have enjoyed no especial pleasure since leaving college, and have suffered no particular ill fortune. Things have gone along very evenly with me. I have worked hard and continuously at the practice of the law, and while I have accomplished nothing particularly gratifying, yet I feel that measured by averages I have done at least moderately well. I now have a private practice in Norwood, Mass. Present address: 525 Washington Street, Norwood, Mass.

## SIDNEY CURTIS

If, as an Ivy orator suggested, it takes a four years' loaf to be college bred, I must be half-baked, for I did not get my degree until March, 1907 (as of 1905). For three years, first as assistant then as instructor in English, I assisted Professor Baker in his courses on argumentation and public forms of address. In his sabbatical year, I assumed the bulk of the work. During the two years following, I worked as instructor in English in one of the other courses. In May, 1907, I cast my lot with the Harvard Alumni Association and entered the newly opened offices of the association as assistant secretary and as business manager of the Harvard Alumni Bulletin. The work of the association was new and untried, but in the four years of existence, the Alumni Association has more than justified its "*raison d'être*" and we find ourselves as busy working for the interests of Harvard graduates and for Harvard University as other men in strenuous occupations. To explain my particular field would be interesting to Harvard men but too long for this report. I have attended the Associated Harvard Clubs' meetings in the west, have

## HARVARD, 1905 — SECOND CLASS REPORT

---

assisted in the formation of some of the Harvard clubs in New England, have spoken at dinners of Harvard Clubs, have addressed high schools and have served on several committees in the interest of Harvard. Having had six years in a law office before coming to college, and between one and two years in a law school, it seemed hard at first to abandon this legal experience for work such as I have described. But to be employed almost entirely among Harvard men, to see and touch—I use the word advisedly—so constantly the men of 1905, and to renew so frequently my college associations, are pleasures in the business itself, the value of which cannot possibly be estimated. I was married April 14, 1909, at Newton, Mass., to Christine Hansen. My work is not making me rich in “pesos” but if happiness is wealth, I am, both at home and in business, many miles from bankruptcy. Member: Harvard Union, Boston Harvard Club. Business address: 50 State Street, Boston. Present residence: 22 Up-land Road, Cambridge, Mass.

I have been a delegate regularly to city and county democratic conventions, but have not been a candidate for any office. I have secured letters patent on a pocket baseball game device for reproducing the out-door game. I have noted with increasing interest the 1905 men who are getting married, and am thinking some of following their example. Present address: Auburn, N. Y.

### ARTHUR LAWRENCE DERBY

I left college in 1904 and took a trip to Europe. In Holland I spent much time at the University of Delft, with our old classmate, Roelvink, who once so aptly referred to "the flowerbed of 1905." While there we established the Harvard Delft Club, which was sanctioned by Mr. Roosevelt, our only honorary member. Then we visited the Rhine country, Germany, Switzerland, Italy, and spent the winter in Paris. Aside from serious study, entailed by work at the Beaux Arts and the Sorbonne (where Professor Wendell was giving a course of lectures), life was enjoyed to its fullest. I returned from London in time to graduate with the class. The following autumn I came to New Orleans. Work with Hard & Rand, a New York firm of coffee importers, has engrossed my attention for five years. In the last ten years New Orleans has increased her coffee imports from 200,000 bags to over 2,000,000. It is the garden city of the south; it has beautiful women, a temperate climate, and is the coming city. It is the logical point for benefit by the Panama Canal and the cheap waterways of the Mississippi. In 1915 we shall have a great exposition, and then you will all come down and learn more about us. You will not be disappointed. Incidentally we mix the best drinks in the world. The drinks will be on me. Will you come? Present residence: 422 Gravier Street, New Orleans, La.

### ROGER ALDEN DERBY

After leaving college in the fall of 1905, I started on a trip around the world with John Perry Bowditch and Samuel Morris Tilden. On returning to America in the summer of 1906, I left almost immediately for England with the Harvard crew that went over to row Cambridge, in the capacity of correspondent for the Boston Herald. In the fall of 1906, I entered Columbia University to study electrical engineering, but at the end of a half-year gave it up and devoted myself to literature. I did some special work for the Outlook, Outing, and for Collier's Weekly, and had one story published in the Century. I attempted to write a number of plays but was never able to convince any producer of their merits. I have since discovered that they had none. For the most part I made New York my home port and the Harvard Club my headquarters. In the fall of 1908 I joined an expedition sent out by the Southern Research Co., of which I was vice-president, to recover treasure from the wreck of a Spanish galleon on Pedro Banks to the southward of Jamaica. We lost our vessel, the "Mayflower," in a hurricane on October 1, about 200 miles north of Watling Island, and were taken off the wreck and brought back to Baltimore on the S. S. "Hippolyte Dumois" of the United Fruit Co. I then went down to Kingston, Jamaica, and helped in the organization of a second expedition that sailed in November. We worked for three weeks on the wreck with no results. In the fall of 1909 I accepted the position of assistant secretary of the Harvard Alumni Association, and changed my residence to Sherborn, Mass. Since then I have been connected with the Appointments Office at Harvard, and last year was made Secretary for Appointments. Address: 9 University Hall.

I spent my vacations in the Summer School, following up special problems in geology. I spent some time on the "Clay Beds of Mekonikey, Martha's Vineyard," and "The Abandoned Shore Lines of South Western Maine." This summer unforeseen circumstances changed all my plans, and led me to the decision to stay in Boston, and to give up all my ideas regarding entering the metallurgical profession. for the winter months. I passed a delightful season at the Royal Technical School, in Charlottenburg, in getting practice in the German language and taking courses related to landscape design. ### **MORTON WENDELL FARRAR**

Morton Wendell Farrar was born in London, O., December 11, 1880, and died in Stillman Infirmary, Cambridge, March 16, 1905. His early education was received at the local public schools and high school, where he graduated in 1899. As a student, he was exceptional in lucid statement, dialectic, keen in observation and able to apply himself. His friends were easily made and held by his sympathy and his readiness to render whatever aid he could under any circumstance. He was a lover of out-door life, but he indulged but little in competitive games, owing mainly to his susceptibility to over-exertion. His great energy, physical and mental, often played havoc with his supply of endurance and he suffered frequently from attempts to do the impossible. He spent two years at the Ohio State University preparing to enter Harvard. He entered Harvard as a sophomore and studied for an A.B. degree. His energy and ability were early recognized and he became friends with members of the faculty as well as his classmates. Unlike many of the men about him, he was interested in the larger problems of philosophy and morality and he was an eager listener to scientific discussions. His death came when the larger powers were beginning to develop and the foundations, laid by industry and loyalty to his work, were beginning to show their superstructures.

### **HENRY COLEMAN FARRINGTON**

Henry Coleman Farrington was born July 19, 1883, at Dorchester, Mass. He went through the Shepard Grammar School and afterwards graduated from the Cambridge Latin School with the class of 1901, with rank above the average. In the class he was personally very popular, and there was not one of his classmates who

had anything but admiration for his fine traits of character. He engaged in the athletic and social life of his class with enthusiasm, serving on class athletic teams, beside holding class offices. His year at Harvard was a most successful one, and his scholarly ability was recognized by the college authorities, who awarded him a scholarship. He had good hopes of receiving another the next year, as he passed his final examinations with high rank. He was an "A" student in Greek. His ambition on leaving college, which he meant to pass through in three years, was to be a teacher, and he certainly had the brightest of futures before him. He died July 17, 1902. He was drowned at the Isles of Shoals, trying to save others.

## THOMAS EDWIN FORREST

Having received a Harvard degree in five years, I felt myself entitled to rest and recreation, so I passed the summer of 1906 loafing in the Adirondack Mountains, silently reviewing the past, and contemplating the future. After mature deliberation, I decided that fame and fortune could be found as readily in the field of finance as elsewhere, so I started to serve my apprenticeship with Lawrence Barnum & Co. In a short half-year, progress was interrupted by the now-famous panic, so I sought refuge in the quiet of London, Paris, Berlin, Switzerland, Italy, and Southern France. Returning in the fall, I resumed operations with the above-mentioned concern, and was promoted to the position of salesman, offering their bonds in Maine, Pennsylvania, and later New York State. Fortune was really beginning to smile when my father's sudden death necessitated permanent residence at home. I succeeded to his seat on the New York Stock Ex-

### WILLIAM GATELY

In college 1901-1903. Has not been heard from. His address is unknown.

### EARL FOSTER GATES

The years that have passed since I left college at the end of the freshman year I have spent in newspaper work. I have found it a fascinating, if taxing, profession, and I am still earning my living and studying life as best I can reporting a wee portion of the events of the day and the thoughts of other men upon these events. But the work of the newspaper man is, for the most part, anonymous, and the longer one is engaged in this work the stronger becomes the inclination to avoid publicity. Therefore my autobiography will be a brief one.

I became a reporter of the Springfield Homestead on January 12, 1903. I remained on the staff of that paper until the middle of November, 1907. I reported the news of the city and wrote special articles on various subjects. For two years I was dramatic editor of the paper, a position I thoroughly enjoyed, and for about a month I was city editor. I have been correspondent for this publication since I left Springfield. I resigned my position on the Homestead in November, 1907. In March, 1908, I went to work on the Hampshire Gazette, in Northampton, one of the oldest of New England newspapers. But the field was much too limited and in June, 1908, I went to Boston and joined the staff of the Boston Traveller. I did the usual work of a reporter who is not a department man, interviewing also many men of national and local reputation and writing special articles. In January, 1910, I was appointed State House representative of the Traveller and covered the Massachusetts Legislature and the state departments during the legislative session of 1910. On September 6, 1910, I was assigned to City Hall to cover the city government and city politics. I am still at City Hall. Present address: 76 Summer Street, Boston.

Cate, '09, I began making preparations for the organizing of a preparatory school for boys on the Pacific coast. The school (Miramar School) is at Santa Barbara, Cal., and at the present writing contains eighteen boys. While in San Francisco, I was a regular member of the University Club. I am now a member of the Harvard Club of Santa Barbara, of which there are thirty members; and of the Country Club. Address: Miramar School, Santa Barbara, Cal.

### LELAND BOYLSTON HALL

After leaving college in the summer of 1905, I lived at home in Malden until April of the next spring. Then I went to Paris, to study there with Harold Bauer, the great pianist. I was in or near Paris till a year from the following June. I lived in a delightful old village, St. Germain, fifteen miles west of Paris. In October, 1907, I gave two recitals in Steinert Hall, in Boston. The critics were complimentary and encouraging. During the winter of 1907-1908 I played in and about Boston in several small concerts, all moderately successful. But the life of a wandering musician, neither very good nor very bad, became after a while almost unendurable and I was happy to receive and accept an excellent offer from the University of Wisconsin in June, 1908, to teach piano in that university. The first months in Madison were the most miserable I have ever known. The utter strangeness of everything about me brought on ghastly homesickness; but I have since become devoted to the University and fond of the students. I have, moreover, lost the feeling that the University of Wisconsin was only a makeshift for those who could not go to Harvard, and have come to realize that it is in itself a splendid, representative university, full of vigor, enthusiasm, idealism, and heart and soul American.

The second year I lectured on the history of music, and at the end of the year was made assistant professor. I finally saw that I should at best never be more than a teacher, and I should be far more contented teaching English than music. I handed in my resignation last May. It was not accepted, but I was promised half-work in the music department and the chance to work for a master's degree in English here. In June, 1912, I shall get my M.A. here and in the following October shall return to Harvard and work there for a Ph.D.

Aberthaw Construction Company, of Boston, the firm that did the work on the Stadium. They had a contract to build a winter residence about two miles from Port Antonio. In March, 1905, I became employed as manager to carry out the development of an estate of more than a hundred acres. This consisted of draining and filling swamp land, building drives and roads, completing unfinished buildings and erecting some new ones, planting gardens, and cocoanut groves, making surveys and maps of the property. I was married July 3, 1905, to Clara Belle Bradshaw, who pluckily left her home and people, in Worcester, and traveled the 1500 miles alone. We were married in the English parish church, the American Consul giving away the bride, and we drove directly to the property for our honeymoon. My married life has been very happy and the honeymoon is not yet over.

I remained in Jamaica until 1907 when I resigned my position. The next day came the terrible earthquake that did so much damage to the island. Although in the midst of it all we were uninjured. The direct cable via Bermuda was destroyed and my cable message "All Safe" sent from Port Antonio over the mountains by mounted carrier to the south shore of the island and thence by cable to Panama, Honduras, Mexico, and so to the United States was the first direct message received in Worcester from the island. We sailed in February, 1907, landing in Boston. Soon afterward I took a trip to Toronto regarding work for the C. P. R. and the Grand Trunk R. R. Later I assisted Professor L. J. Johnson in concrete research and remained with him two months. Then followed a short employment with the Eastern Expanded Metal Company, of Boston, in concrete work, and with the Hassam Paving Company, of Worcester as superintendent of building a concrete road in Williamstown, Mass.

In September, 1907, I entered the building department of the American Optical Company, Southbridge, Mass. as engineer and draughtsman. On January 1, 1909, I entered the office of the city engineer, of Worcester, as draughtsman.

### EMERY MARDEN HEAGAN

Emery Marden Heagan was born in Prospect, Me., October 27, 1880, and died in the Oakes Home in Denver, Colorado, March 11, 1908. He was graduated from the Belfast high school with the class of 1899. The two years following his graduation from the high school were spent in work upon the farm, teaching district schools and in diligent application of all his spare time in perfecting his preparation for Harvard, which he entered as a student in 1901, and from which he graduated with honor in the class of 1905. For a short time after his graduation he devoted himself to literary work, in which he showed marked ability both of thought and expression. He taught the high school at Jonesport in the winter of 1905 and 1906, and in the spring of 1906 he went to New York and entered the employ of the Metropolitan Finance Company. He remained in the New York office but a few weeks before he was promoted to a position in Lowell, Mass., as representative of this company, whose business was the loaning of money to large manufacturing corporations on sales of their products. In this most responsible position he acquitted himself most satisfactorily to his employers, but on account of the death of his mother, and his own failing health, he resigned his position in Lowell and returned to the farm with his father. His father's death soon afterwards brought on a great physical strain. Emery immediately went to Colorado, fully confident he should there regain his health. His letters to his friends were hopeful to the last, but in a letter written about a week before his death, in recounting a trip to the foot-hills, he incidentally mentioned a slight trouble with his throat and that he feared he had taken cold. Nothing is known at present of the immediate cause of his

death but is probable that the cold developed other and fatal complications.

### ROGER ADAMS HEARD

There is nothing much to say concerning my life. I am unoccupied at present and my address is 20 Louisburg Square, Boston.

### ARNOLD COLLAMOUR HEATH

Owing to much cutting, the dean prevailed upon me early in 1907 to leave college. I went into my father's publishing house in New York where, for a microscopic wage, I waited upon teachers a-shopping, composed alluring circulars, and tried with varying success to stir up a book trade with private schools. After some ten months of these activities a telegram called me home to the death-bed of my father. Having always aspired more warmly to literary than to commercial matters, I called upon our editor in Boston and asked for work in his department. Here I encountered the first real suggestion of the practical value of a college degree; for our editor, a tiny bespectacled gentleman in a crowded, book-lined room, told me quite shamelessly that no one could enter the editorial service of D. C. Heath & Company without either a college degree or experience in teaching school. College again loomed large, attractive, and much more purposeful. The dean received me kindly, but not too trustfully: he recommended a year or two at the Bridgewater Normal School. Thither I went. I took the special one year course for college men and women. I organized and conducted classes in story telling, platform speaking, and dramatics. In the last mentioned class, my largest—seventy young women—we read and staged "The Merchant of Venice." This fact, together with the rumor of my studies in the theatre, in acting, and in the drama generally, soon imposed upon me the character of a leading histrionic light of the neighborhood; and I undertook with much pleasure and some success to stage various farces and other entertainments for the townsfolk. That year I

## HARVARD, 1905 — SECOND CLASS REPORT

was also elected president of my class and editor of the school annual.

In the following summer I traveled for the sixth time in Europe, but visited no unfamiliar lands. I have but recently returned; and though I have been assured that a good normal school position is waiting for me in the west, I shall return at the coming mid-years for an A.B. and an A.M. at Harvard,—providence and the dean willing. I have already communed with both. I have not as yet dared to offer much of my work to publishers; but the Boston Transcript has published four or five bits of verse for which I am responsible. My future plans are the study of literature and the drama, and authorship. I was married at Providence, R. I., July 23, 1903, to Ida Florence Seaver. Present residence: Hotel Buckminster, Boston.

### GEORGE MILTON HEATHCOTE

The first winter I spent in the employ of Mills Brothers, 36 Wall Street. I next became private secretary to the secretary of the American Bridge Company. I afterwards attended the New York Law School, and tutored a boy for two years. After leaving the law school I became secretary of the schooner yacht "Amazon" used by the New York City Young Men's Christian Association for cruising purposes. My trips took me as far east as Boston. At the end of the season I became financial secretary of the New York City Young Men's Christian Association. In February, 1909, I became general secretary of St. Bartholomew's (Church) Men's Club. The membership is 450. The work is similar to that carried on by the Y. M. C. A. lacking the religious part. In January of this year I gave an address on "Camp Life" at the conference held by the New York City Child Welfare Association. On December 3, 1909, I was married at Fairview, N. J. to Edna Gilmore Smith. Priscilla, born October 2, 1910. Present residence: Hunter's Point Apartment, 163d Street and Southern Boulevard, New York City.

## **RALPH SAMUEL HERSEY**

Ralph Samuel Hersey, son of the late Samuel Nudd Hersey and Catherine M. Hersey, was born in Wolfeboro, N. H., July 17, 1882. He attended the town schools of Wolfeboro and the Brewster Free Academy, graduating in June, 1900. That same month he passed a successful examination and was admitted to Harvard College. A severe illness prevented him from entering Harvard until September 1901. Sickness compelled him to leave college May 17, 1902, and he returned to his home in Wolfeboro. After great suffering, most patiently borne, he died June 25, 1902, of rheumatic endocarditis. In 1898 he united with the Congregational Church of Wolfeboro; was an active member of the Y. P. S. C. E. He was of a very happy, genial disposition and made friends wherever he went. While at Cambridge he identified himself with the Y. M. C. A., working with them during his stay there. While at Columbia I completed two years of theological studies at the Union Theological Seminary, and was accepted as a "postulant". My ideas lead me to give up this profession so I entered the Columbia Law School in 1909, and at the same time became the head of the department of English in the Cutler School. At the request of the Committee of One Hundred I investigated the increase of tuberculosis and the high death rate among children in the tenement house

### ROSSITER HOWARD

I left college in the fall of 1902, and taught music for three months in a little school in Philadelphia, and then at Christmas time went to Andover, where for two years I taught singing and directed the music in the chapel. During that time I continued my own study in singing and did some work in composition with Percy Lee Atherton, '93. In the summer of 1903 I came abroad with the Bureau of University Travel, and found that they were doing in painting and sculpture exactly what I wanted to do in music—teaching it not the way we had the history of music in college, but more like the courses in literature. Curiously I found the music gradually giving way to art, and today my work is entirely in painting and sculpture. In the fall of 1905 I was married to Alice Woodbury at Montclair, N. J., and came immediately to Paris. Elizabeth Howard, born at Paris, October 26, 1907. During the winter I have art classes in Paris. In the spring I make a party of my pupils and take them to Italy and Greece, coöperating with the Bureau's lecturers in history and archaeology, cruising on the company's yacht along the Grecian shores of the Mediterranean. Each summer I spend in Italy with the summer school of the same institution. I have traveled in England, France, Switzerland, Italy, Spain, Greece, Turkey, Germany, Russia, Holland, and Belgium; but my work keeps me most of the time in Paris, or Italy and Greece. I saw Rae Atherton in Paris

### GEORGE LEWIS HUNTRESS, JR.

I was compelled to leave college last part of my sophomore year, 1903, on account of an operation upon my eyes, which after being performed, left them in such a condition that I was advised that I could not continue my course in mechanical engineering. I secured a position as contract solicitor in the New England Telephone & Telegraph Company, of Boston, and worked for them a year and a half. When I left them, I was the advertising manager of that company. I accepted a better position with the telephone company of Baltimore, and was with them only a few weeks, when I broke down with nervous prostration, which made it necessary for me to be out of employment for over a year. On regaining my health, I became associated with the Bell Telephone Company, of Philadelphia, where I remained about a year. While with them, I became instructor of a school for the teaching of new men in the contract department. I later went with the Edge Moor Iron Company, of Wilmington, Del., with whom I was associated for a period of about two

## GEORGE SCHUNEMANN JACKSON

After graduation I studied bookkeeping for a short time. Then I went to Chicago and entered the real estate and loan business of Aldis & Company, where I have been ever since. I have been connected with the management of property, especially office buildings, as well as some investment in bonds for various trusts. Several members of the firm are Harvard men, and it is a most pleasant office. The Harvard Club here has about 325 members out of a possible 700, but it is being increased every year by the activity of the officers. We have raised a scholarship for Harvard, which we hope to increase to three. In a few years we hope to have a house, or at least some rooms for the club. In January, 1910, the 1905 men held a dinner, at which ten out of a possible nineteen were present. I find Chicago interesting, the country around it pleasant and easily accessible, and the people delightful and most hospitable. At present I am in an apartment with five

Buying and selling violins is its most important feature. In December, 1908, I left this firm, owing to a dislike for "commercialized music." ### IRA BEAMAN JORALEMON

After leaving college, I spent two years in the graduate school studying mining, and then came to Arizona. My first work here was "holding the ignorant end of a tape" in the engineering department of the Calumet and Arizona Mining Company, of Bisbee and Warren. Soon I changed to the geological department. I now hold the job of examining engineer. In this position my principal work is examining mining properties to determine if they are worth developing or buying. I have been in most of the mining regions of southern Arizona and northern Sonora, thus getting much fine experience. I have planned most of the development work on properties owned or held under option by the Calumet and Arizona Company outside of Bisbee. During intervals, between trips, I do geological work in the mines here, helping direct prospecting. Aside from work, a country club is the only excitement Bisbee affords. Metallurgical engineer. Has not been heard from. His address is Addison, Tex.

### PAUL BARR KAYSER

I have done little since leaving college but write dramas, more or less of a poetic and historical nature. The rest of the time I have spent in research. I am sorry that I cannot give any more specific information, for anything else I might mention would be so trivial that it could be of little interest to the class as a whole. I spent some time in the publishing house of D. Appleton & Company, and a certain period on the stage, in stock,—but of late years I have concentrated entirely on the writing of drama. Present residence: "Bally-brach," Larchmont Manor, N. Y.

### CHARLES BUTLER KEELER, JR.

In the fall of 1905 I entered the office of Pond & Pond, architects, Chicago. By February, I had decided that I was not big enough to be an architect. I entered a large printing concern as "devil," to learn more of the practical part

## HARVARD, 1905 — SECOND CLASS REPORT

of the business. "Punching" a time-clock, the idea of which I detested, at the beginning and end of the noon hour, eating a much-too-hurried lunch, and running over to the Art Institute for fifteen or twenty minutes, or sitting on a "hell-box" in the printing office and reading French were my activities. I tried to go to the Art Institute evenings, but my health would not stand it. By June I found that I had known just as much of the "practical part" of the printing business in the beginning, and was in a very run-down condition as to health. I took a trip on the Mississippi, and spent three months on a ranch in Wyoming, south of Laramie Peak, most of the time in the saddle. In the fall I entered the first year decorative designing class at the Art Institute and by the end of the year had been lucky and got the "blue ribbon". I spent the summer on the Wyoming ranch, returning home hurriedly on the death of my father. I quit the designing class and spent the year intermittently in the antique and life classes at the Art Institute. I spent the summer of 1908 with another 1905 man, W. B. Blake, tramping in Brittany; then by myself went south, and walked over the Pyrenees, through Andorra, into Spain, down the east coast, and home by way of Tangier and Gibraltar. I was at the Chicago Art Institute until April, 1909, when I went for eight months to Italy, France and Germany. In February, 1910, I lived in a lumber camp in British Columbia. I spent the summer at Edgartown, Mass., painting under John Johansen. I have been pegging away intermittently since then.—All of which reminds me of the old story of the farmer who brought his son by the scruff of the neck into the office of the editor of a country newspaper, explaining that he had tried to make a farmer, a lawyer, a store-keeper, etc., out of him, but the boy failed in everything—so his father now brought him there "to make an editor out'n him". Present address: care of Dr. D. E. Rhodes, 5045 Washington Avenue, Chicago, Ill.

After leaving college in the middle of my junior year. I did not join any learned societies. I spent the first eighteen months in the far west, riding decrepit polo ponies and increasing the national debt. The scene shifted to the middle West, where I spent three years of my life, part of the time chasing nimble trolley poles for the Chicago Union Traction Company, and the rest of the time chasing advertising for the Chicago Tribune. From that time on I have wandered through various cities of the east, staying as long as the local police force would allow, until about eight or ten months ago, when I, with several other members of the illustrious class of 1905, started an electrical company for the sale of electric light fixtures, automobile accessories, etc. We are located at 38 East 23d Street, New York City. I only need add that I am heart whole and fancy free. I add this information inasmuch as our secretary seems to consider this subject a very important one.

After graduation I returned to my home town, Du Bois, Pa., and began work on an engineer corps for a bituminous coal company. The year or more which I spent with this concern kept me in a little mining town, where almost any other language than English would have been of real service. Perhaps, however, I should have been more appreciative, when such romantic, old-world sights as that of a three-hundred pound Italian damsel tramping grapes in a wash tub were so common. In August, 1906, I took charge of the construction of a blast furnace plant for the Hamilton Steel and Iron Company, Hamilton, Ont., where I remained until shortly after the furnace was "blown in" in November, 1907. It is very pleasant to remember the hospitality of the Canadians with whom I came in contact. After some time in Du Bois, during which I was interested in the installation of a filter plant for the village of New Bethlehem, Pa., I went to Duluth, Minn., where I did some surveying for a proposed trolley line. Later I installed a number of recording pyrometers and gauges at blast furnaces for the Bristol Company, Waterbury, Conn., and following this inspected concrete for the Detroit River Tunnel Company, and designed reinforced concrete structures for the Trussed Concrete Steel Company, Detroit, Mich. In August, 1909, I accepted my present position as assistant to Mr. Samuel E. Duff, consulting engineer, Pitts-

### **SIDNEY BUTTRICK NOYES**

Died at Atlanta, Ga., November 17, 1902.

### **LEWIS IRVING NURENBERG**

My first position upon leaving college was in the chemical department of the University of Maine Experiment Station, at Orono, Me., where I went in October, 1905. The chief problem with which I was concerned here was, "the digestibility and nutritive value of corn meal" as an article of diet. Four students of the University of Maine, varying in weight, height, health, and appetites, were used as subjects in this work. The experiments were carried on at ten week periods, during which time the men were required to eat all of their meals in the laboratory. The corn meal was prepared in various ways, such as johnny-cake, hoe-cake, etc., and a record kept of the exact amount of all the ingredients used in preparation. One week, a simple diet would be served the men three times a day, consisting of johnny-cake, butter, milk, and coffee, with the addition of preserved fruit for "supper." The next week the diet was compounded by the addition of hamburg-steak for "dinner." The third week the diet was simple again, the corn meal being served in another form, etc. Careful record was kept of the amount of food consumed by each man and analyses were made of all food used and on all excretion. The experiments were successful and have been published.

In May and June of 1906, the University of Maine conducted two "Farming Special" educational trips, with which I was invited as one of the lecturers. These trips were carried on for the purpose of educating the farmers of Maine

with modern methods for the cultivation of the soil, of the growing of crops, testing of seeds, care of cattle, etc. Several baggage cars of the Maine Central and Bangor & Aroostook railroads were fitted up with exhibits illustrating these problems, and at the various railroad stations the lectures were given covering a period of thirty-three days.

In August, 1906, I received a position with the Massachusetts State Board of Health, as an analyst in the food and drug laboratory. Together with Mr. H. C. Lythgoe, analyst of the department, I have made, "a comparison of the methods used in preparation of milk serum,"—i.e. to detect "added water in milk". This article appeared in the *Journal of Industrial and Engineering Chemistry*, January, 1909. In the State Board of Health report, 1910, the articles, "the rate of decomposition of sweet spirits of nitre," "the composition of tincture of jamaica ginger," I have worked up. For four years I have also taught chemistry in the Roxbury, (Mass.), Evening High School. Member: American Chemical Society, Association of Official Agricultural Chemists. Present residence: 8 Hazelwood Street, Roxbury, Mass.

### HARLAN FOSTER OBER

After graduation I took a position with George H. Walker & Company, lithographers and engravers, Boston, selling maps and atlases. I worked a short time as reporter on the Boston Transcript, leaving to accept position as superintendent of Falvey Brothers' department store, South Boston, in which place I remained till April, 1906. After farming it for several months, I accepted an opportunity to go to India and Burma, teaching in a religious and social movement—known as the "Bahai Revelation." I visited the Holy Land and Egypt, but spent most of my time in India and Burma, where I both studied and taught, lecturing in various schools and colleges, and before various societies and groups of peoples of differing nationalities and religious and social beliefs. My interest was in furthering religious and social unity, and this brought me in contact with many leaders in thought

everywhere. In some places I lived in the native quarter, for I wanted to see facts as they were. My companions were a New York business man, and two Persians of education, and our interpreters. Returning to America in July, 1907, I spent several months, speaking before assemblies in eastern United States. As I expected to return to the Orient, I took a temporary position with Crowley & Lunt, publishers, Portland, Me., and Beverly, Mass. During the presidential campaign, 1908, I was located in Chicago, at National headquarters, being assistant campaign manager of the National Republican College League and managing editor of the National College Republican, a weekly paper published by the league, circulated in 300 colleges. I was giving a series of addresses in Chicago at the same time on the subject of world unity, world peace, etc.

After two months in New York City, I returned to Boston, and worked at various times for "Boston 1915," selling stock for "The Boston Common," in which many Harvard men are interested, and I also worked for the Massachusetts No-License League. the Adirondacks, followed by a short trip to Colorado; the second, after two weeks on horseback in the Yellowstone, in Alaska on a shooting trip. I went steerage—don't try it. I got two bears and a lot of smaller game. I came back through British Columbia, climbing a mountain or two. I was married to Catharine Sabine of Brookline, June 11, 1908. We spent a year abroad. We lived on the north coast of France during most of the first summer, took a leisurely trip up the Rhine and through Switzerland to the Italian lakes, and then went to Rome where we had apartments and kept house for the winter. I read the *whole* of Gibbon's "Decline and Fall", and stroked a four-oar on the Tiber. I saw Messina after the earthquake. I spent the spring of 1909 in Egypt and Palestine. Went up the Nile to Luxor. Rode horseback across country from Jerusalem to Damascus, via Nazareth and Sea of Galilee, in nine days. Pretty rough. And it happened to be dangerous then on account of the outbreaks and massacres following the revolt of the young Turks. I returned to Paris, studied three months at the Sorbonne, Ecole de Droit, and made a short stay in England and returned home in July, 1909. I went into the law office of Ropes, Gray & Gorham, 60 State Street, Boston. Am still there. I haven't decided yet whether it is an office "of profit" or "honor" or trust." ### JACKSON PALMER

Immediately after graduation, I entered the Harvard Law School, and received the LL.B. degree June, 1908. I was admitted to the Massachusetts Bar in February, 1908, and to the Federal Courts one year later. I entered into partnership, at 6 Beacon Street, with J. A. George, in April, 1908. My partner was a graduate of New Brunswick University, also of Harvard, A.B.'99, A.M.'00, LL.B.'06. The firm of George & Palmer dissolved two years later, after building up a considerable practice. I was married at Auburndale, Mass., October 10, 1908, to Mary Follett Perkins. In September, 1909, my father, Charles Dana Palmer, '68, died. For some time after that I devoted attention to affairs connected with the administration of his estate. In August, 1910, I opened my present office in the Paddock Building, Boston, where my practice is steadily increasing. For the past two years I have been engaged by the Taxpayers' Association of Middlesex in investigating the financial administration of Middlesex County affairs. Whether any results will be achieved is a matter left to the future to decide. The experience has been most interesting. Present residence: 129 Fairmount Street, Lowell, Mass.

## TOWNSEND PALMER

Mr. Chalmers. I thence went to Duluth, Minn., under Bishop Morrison, until my mission became a parish, of which I then became the rector. After four years at St. John's, Duluth, I came to Gardner, Mass., as rector of St. Paul's Church. I was married at Boston, February 22, 1909, to Susan U. Sparklin. I have written no books, but lots of sermons not yet in book form. Athletics were not left behind on leaving the university, but continue on in form of parish calls and "boy scouts" expeditions. ## EDWARD CHARLES PARKER

After leaving college, I worked for a year as reporter on the Philadelphia Public Ledger. The next three years I

spent in Pittsburg, where I finished the course in the Allegheny Theological Seminary and secured the degree of doctor of philosophy, from the University of Pittsburg. I was married in England, during the Christmas holidays of 1908, to Dora Hunt, younger daughter of the late W. H. Hunt, doctor of music, and the first president of the Liverpool College of Music. In June, 1909, I took up residence in Birkenhead, where in November of the same year my wife died. During my residence in England, I matriculated at the University of London and hope to secure a degree from that school in a year or two. Present residence: 2249 North 2d Street, Philadelphia, Pa.

### DONALD PARSON

After leaving college, I accepted a position in the sales department of the Youngstown Car Manufacturing Company, and immediately advanced to the giddy height of sales manager. This seems to have made the organization top-heavy, for it soon fell, retiring from the field honorably but surely, and leaving me to hunt a new pasture. Then I organized an automobile selling company, doing business under the euphonious title of Motormart, and that is my present occupation. On October 5, 1907, at Youngstown, O., I was married to Frances Arrel. I contribute occasional articles on selling and salesmanship to the trade papers and export journals. I belong to the various local clubs and the Chamber of Commerce. A summer in Maine each year, and, if lucky, a winter month in the south—the rest of the time in dirty, ugly, busy Youngstown: such is my rather humdrum, yet happy, existence. Present residence: 218 Spring Street, Youngstown, O.

degree. Although firmly resolved not to come to New York City, I took a position with Robinson, Biddle & Benedict, 79 Wall Street, which I left after a few months to go to the Pacific coast. But I finally sought a location in the south. In Atlanta I got an offer—to read titles. But I went out and looked at the chain-gang darkies chopping rocks, and decided to abstract no titles so long as a human job like theirs could be had for the asking. Though not quite sure that New York life—two hours per day in the subway—is greatly preferable to the Atlanta chain-gang, I am back in New York. I am in the office of Burlingham, Montgomery & Beecher, 27 William Street, where practice consists chiefly of transportation and admiralty cases, and I have no present quarrel with the gods who give and withhold. Home address: 1850 Amethyst Street, Bronx, New York City.

Frothingham and Hugh Bancroft. This is not a partnership but each of us is technically independent of the other, each practising on his own hook. Being, however, the least experienced and least known of the group, such limited success as I have had is due largely to the opportunities that have arisen through my fortunate associations. I served in the United States Navy during the Spanish War, on board the U. S. S. "Prairie," seeing service in Cuban and Porto Rican waters. We were under fire several times, one of which, Mariel, July 5, was considered important enough by the department to warrant giving each of us a battle medal. Outside of the above little excursion into the realms of adventure, my life has been about the same as any other man's in these prosaic days of earning a living and raising a family. On June 15, 1904, at Dorchester, Mass., I was married to Bertha May Watson. Richard Merrill, born July 3, 1907. Member: United States

ment, at a comfortable salary. On June 11, 1908, at Lenox, Mass., I was married to Lucy Peirson Newton. I had apparently attained success; but before two more years had passed, in December, 1908, my bubble had burst. It developed that one unscrupulous party had more to say about my future than I chose to have him. He controlled the cash, I controlled nothing; suffice it to say we parted.

A short time, thereafter, I tried my hand as a traveling salesman; but left the road in October, 1909, to take up my present duties as purchasing agent for Eaton, Crane & Pike Company, paper manufacturers, Pittsfield, Mass. Present residence: 10 Kent Avenue, Pittsfield, Mass.

After completing my college course, in 1904, I went directly to New York, taking a position in the circulation department of Outing Magazine. When this paper moved its offices to Deposit, N. The work was finished early the following summer and after spending a few weeks

### BENJAMIN CURTIS TOWER

On leaving college in December of my junior year I entered the Chesapeake and Potomac Telephone Company, Baltimore, Md. Lack of interest, owing to my inability to grasp the electrical technique of the business, made me return to Boston, June 1, 1904. I then went abroad. In the fall of that year I went into the brokerage business in Boston, starting as a clerk putting up quotations on the board in a large brokerage house. Soon I became a "customers' man," but not until I had experienced the work of the various departments. I finally gave up my intention of going into the brokerage business for myself, preferring to go into the real estate, insurance, and mortgage business. Before entering my new line of work, I went to Europe, in the early summer of 1907, to take part in the Sonder Klasse yacht races in Germany and in Spain under the auspices of the Eastern Yacht Club of Marblehead, Mass. In the fall I started my real estate and insurance business in which I am still engaged. I have no regrets, cause of complaint. The loss of my dear father in June of last year was a terrible blow to me, and as an "old sea dog" would say, "carried away a big anchor to windward." In spite of my loss, however, I hope to attain success.

Address: 35 Congress Street. Residence: (after September 1, 1911) Dover, Mass.

### ARTHUR HERMAN TRAIN

After Commencement in 1905 I entered the employ of the General Electric Company, at their plant in Schenectady, N. Y., and spent six months on experimental work with steam turbines. As I wished some practical knowledge of electrical machinery and apparatus I spent the next sixteen months in their electrical testing department, going through most of the more important "tests" and, during my last few months, acting as assistant in charge of one of these "tests." In May, 1907, I entered the commercial department of the Boston Consolidated Gas Company, in what might be termed the "engineering division" of this department. This "division" handled the placing of gas engines and gas-engine-driven electric lighting and power plants. In August, 1908, after spending all the time that seemed best in this line of work, because of certain business conditions, I accepted a position as instructor in mechanical engineering at Harvard for the college year of 1908-1909. I took additional courses in engineering, and this, together with considerable research work for Professor L. S. Marks, made this a very interesting as well as profitable year. Since June, 1909, I have been with the New York Central and Hudson River Railroad Company. I started in their car shops at West Albany, N. Y. Since then I have been over nearly all the road on inspection work of new car shops and on special work. For five months I was stationed at East St. Louis, Ill., inspecting materials for new cars. ## WALWORTH TYNG

I spent the first eight months after Commencement, 1905, resting. I then went to western Washington, and shortly engaged in the lumber business, beginning as a laborer in a planing mill (Puget Sound Mills and Timber Company), at Bellingham, Wash., and worked up through several grades. After six months in the mill, I took four or five months to look around the country somewhat for business openings. Then I lived seven months in the logging camps of the Lake Whatcom Logging Company, in charge of the surveying party, mostly laying out logging railroads. In September, 1907, I left this work to enter the Harvard Law School. Under the influence of a very unusual Christian minister I had resolved in the spring of 1906 to live a Christian life. In camp I decided that my deepest interests lay rather with a profession, giving opportunities for public speaking than with purely business affairs. I came east to try law. But I found myself convinced within a month that the work I wanted to do could be best done through the ministry. Family tradition and personal preference both pointed to our Episcopal Church. I left the law school February, 1908, and spent the second half-year at work on the Sage Foundation. I served on the relief work after the Chelsea fire. I collected statistics on factory ventilation, in which work I visited factories almost all over New England. In September, 1908, I entered the Episcopal Theological School, Cambridge. My first year 1908-1909, I did Sunday work at St. Mary's, Dorchester, under Rev. George L. Paine. The

### CHARLES ADAM WEISSERT

After leaving college I became a member of the staff of the New York Herald. Ill-health compelled me to abandon metropolitan journalistic work, and, after spending some time in the south recuperating, I returned to my home in Hastings, Mich. I have since lived in Hastings, engaged in editorial work. I have traveled extensively in the southern and western states, in Canada, and in Mexico. ### HARRY WESSLING WEITZEL

After leaving college, I spent a pleasant summer at home and then went to New York City where I entered the brokerage office of D. O'Dell & Company, for whom I worked seven months. I began as a "runner," was "promoted" to "ticket clerk," and in August took a vacation in order to spend the large savings I had managed to accumulate from my \$6.00 per week "salary." The next fall I returned to New York and went to work for an automobile accessory manufacturing company. The following summer I felt the lure of the west. I took a very pleasant trip—steamship to New Orleans, Southern Pacific train to Portland, Ore., and then to Seattle, Wash. From August, 1907, until the latter part of October, 1908, I was a kind of commercial free lance, doing a little of everything from driving a delivery wagon to selling a house and lot in order to make a living. Often I found myself longing for the flesh pots of New York,—though I don't think I should have cavilled at the lamb pots of Memorial Hall, for any old pot with a square meal in it would have done. Sometimes for a month or so I averaged \$50.00 or \$60.00 a week, other times I did not clear living ex-

penses, still I managed to make a fair living and enjoyed the experience. I enjoyed too the monthly Harvard Club smokers. In January, 1909, I was commissioned a second lieutenant in the Marine Corps, and was ordered to the Marine Officers' School at Port Royal, S. C. for instruction. My class of fifty-seven student officers was graduated in December, 1909, and I was ordered to Washington for duty. After doing a five-months' tour at the barracks in Washington, I was ordered to report as second in command of the marine detachment on board the U. S. S. "Delaware." From May 25 until September 25, 1910, I was the junior officer of the Ninth Division which handled the six after guns of the five-inch battery. After battle practice in which the "Delaware" made number one of the Atlantic Fleet, I was detached and ordered to my present station, the Marine Barracks, Navy Yard, Philadelphia, Pa.

### CHARLES HAROLD WELBORN

Charles Welborn passed away October 4, 1904, after a short illness with a most malignant form of smallpox. He was born December 22, 1881, and was about twenty-three years of age. He was the son of the late Dr. W. P. Welborn, being the youngest of this family. He left a mother and three brothers in deepest sorrow by his untimely death and the entire community mourned with them the loss of a most popular, amiable and upright young man. He secured his common school education in the city schools, graduating from the high school. He then entered the academy at Exeter, preparatory to entering Harvard University. He graduated from Exeter in 1900, entered Harvard with the class of 1905, and received his degree in June, 1904.

I not only missed the festivities and commencement exercises, but was ill for six months with peritonitis, not getting out to the Law School until December. I was graduated from the Law School in June, 1908, and was admitted to the bar, in New York state, in October, 1908. Since that time I have been in my father's office at 15 Wall Street. cannot dispose of what you manufacture, there isn't much sense making it. About a year later, I was made president of the concern, Central Oil & Gas Stove Company, manufacturers of oil stoves, at Gardner, Mass. I hold the position now. About a year later we took over a printing plant here in town that was in difficulty. I am also president of this Meals Printing Company. In 1908 my father and I took an interest in the E. F. Hodgson Company, (portable houses), of Dover, Mass. We provided the portable sun parlors, which the crew uses for their quarters at Red Top. I am treasurer of this concern. Two years ago, my father, in order to concentrate his resources, formed the Wilder Industries, Incorporated, which in addition to the concerns named above controls the Florence Company, (cabinets, gas and oil stoves, metal and wood specialties) and Boynton & Plummer, Incorporated, drills, blacksmith tools and machines). We have recently had an institution of our new chapter—Gardner Chapter—of which my father is high priest and I am captain of the host. We have just been through a hot political fight. William H. Wilder, my father, is now congressman-elect from the fourth district, being one of the few republicans to pull through the democratic landslide. That was a wonderful experience for me. ### OBITUARY

George Gurdon Steele was burned to death at the Midvale Steel Company on April 15, 1911. Steele was with this company for four years as chemist and assistant to the head of the open hearth department. A narrative of his life since graduating from college appears in another part of this book. In the four years of his service with the Midvale company, Steele was infinitely successful, and made unusual advancement because of his loyalty and faithfulness. He was the first official ever killed at the works, and his loss in manifold ways is keenly felt by all of the officials. His wife survives him. They were married but fifteen months at the time of Steele's death.

### BIRTH

Eleanor Egan, daughter of H. Chandler Egan, born April 9, 1911. Weight 71½ pounds.
